Streamline workflows across the entire lease lifecycle by leveraging intelligent data capture, analytics, and integration with your LOS and LOB systems.

Which IntellaLease Solution is Right for You:

**Credit Application Acceleration**

Automate the process of ingesting credit apps and inputting data required to render a credit decision.

**Document Package Receipt Automation**

Minimize manual tasks associated with processing paperwork required to book approved credit transactions.

**Asset Creation Automation**

Eliminate manual data entry associated with entering asset data into your portfolio management system.

# Want Timely and Transparent Lease Processes?

## IntellaLease is the Answer

IntellaLease expedites lease processing and quality analysis by intelligently capturing and indexing lease documents, evaluating the presence and accuracy of required documentation, and validating data across the entire lease life cycle.

### Capture Lease Files

Automatically ingest lease documents from various sources such as email, cloud storage, FTP, XML, Web & Mobile Apps, etc.

### Business Rules Engine

Streamline manual effort and facilitate compliance with a configurable rules engine that enables authorized users to add computation and logic.

### Classify Lease Files

Effortlessly identify documents with configurable classification rules, including over 100 pre-configured document types found in the most common leases.

### Integration Framework

Integrate with LOS, ERP, ECM, CRM, etc. to facilitate real-time data exchange using industry-standard protocols such as APIs, flat file formats & SQL scripts.

### Extract Data

Automatically extract key lease data from any document with minimal manual intervention faster and more accurately than any human.

### Reporting & Analytics

Gain business intelligence insights to operational, administrative, and auditable metrics with interactive dashboards and charts.

### Document Management

Use advanced document management features such as checklists, workflow, taxonomy, access & version control, & retention policies within a consistent user interface.

### Export Service

Export lease documents and associated data on a recurring or real-time basis in various formats. Metadata & file paths are passed in flat file format.

Simplify → Streamline → Accelerate

MTS Software Solutions provides technology and outsourced services that simplify, streamline, and accelerate document and data-driven processes. Our leasing industry solution, IntellaLease, automates lease document processing and quality analysis by combining capture, workflow, and analytics technologies.
